

## DID YOU KNOW?

**Solar** - You can earn money from your unused solar power! If you don't use all the energy your panels generate, you can export it to the grid and earn money from it.

**Electrical Vehicle Charging** - smart EV chargers can be managed and restricted to optimise energy consumption from your mobile phone.

**Air Source Heat Pump** - is not just for new builds! ASHPs can be installed in old and new buildings.

## ENERGY EFFICIENCY THAT'S BETTER FOR YOUR BUDGET

# RENEWABLE ENERGY SYSTEMS MAKE SENSE FOR YOUR POCKET AND THE ENVIRONMENT

## WHY US?

- Clear information you can trust to help you make a well informed decision.
- Concept to completion, high quality installation.
- Local family run business

## RENEWABLE ENERGY SYSTEMS FOR YOUR HOME & BUSINESS MADE EASY

  
Beatties

# ARE YOU CONSIDERING RENEWABLE ENERGY SYSTEMS FOR YOUR HOME & OR BUSINESS?

If so, we would like to introduce you to three individual renewable energy systems **we offer** at Beatties.

## **Air Source Heat Pumps (ASHP)**

provide a building with heat and hot water and are an alternative to a gas or oil fired boiler.

## **Solar panels**

provide power to a building using sunlight.

## **Electric Vehicle (EV) home charging points**

provide a means of charging your EV from the comfort of your home.

# WHAT ARE THE BENEFITS TO INSTALLING...

## **AN AIR SOURCE HEAT PUMP**

- **Low running costs** - meaning lower energy bills
- **High efficiency** - more heat for your money
- **Low maintenance**
- **Low carbon heating system** reducing carbon emissions, going green
- **Possible Government Grants** check the government site for incentives

## **SOLAR PANELS**

- **Save money** - with your own solar panels you can save on your energy bills and be less reliant on energy suppliers.
- **Renewable energy source** - the sun is a clean unlimited source of energy, unlike oil, gas and coal.
- **Reduce CO2 emissions** - YOU will be contributing to the reduction of CO2 emissions and a sustainable future.

## **AN ELECTRIC VEHICLE CHARGER**

- **Convenient** - no more waiting at a public EV charge station
- **Cheaper** - home charging points cost less than public points
- **Faster** - most charging stations installed in public spaces do not offer fast or rapid charging

# WHAT CAN WE OFFER YOU?

An initial free of charge phone consultation to discuss your needs and any questions you may have,

A visit to the premises to gather information to help us provide you with personal recommendations and a quote.

The decision is then yours as to whether you want to proceed.

If you accept, our friendly, trained and experienced staff, will design, install and commission your chosen renewable energy system.

To follow:

- Warranty
- Operations & Maintenance Manual to include certification documents and manufacturers instructions
- Optional aftercare service

**CONTACT US TODAY TO FIND OUT MORE & ARRANGE YOUR FREE PHONE CONSULTATION**
